SOTIMARIN DECK BOARD

MADE BY PROFIS

The completely prefabricated deck board. An ideal method for rebuilding or subsequent fitting. „First Class“ in accordance to old tradition and modern technology.

MAIN ADVANTAGES

- *no waste, only the effective area (m²) will be charged*
- *production in one piece, alternatively in two or more pieces with finger joints to simplify the transport*
- *easy assembly*
- *no screws required*
- *no plywood with imitated grooves*
- *no veneer*
- *conventional, low cost manufacturing method*
- *light weight*
- *sandable joint sealing*
- *long durability*
- *comparable with a 12 mm planked deck*

CONSTRUCTION in total thickness abt. 9 mm

Curved deckings according to your deck shape

Profil No. 9 6 x 35 mm

Teak

King plank

Teak or Mahogany

Margin plank

Teak or Mahogany

Joint

6 x 4 mm

filled with elastic sealant stripes

Counter panel

3 mm 3-plyies

Hydro-Mahogany marine plywood

Alternatively also possible with other counter panel.

1. GFK 1,0 mm.

2. Hydro-Mahogany 1,8 mm.

3. Hydro-Mahogany from 6 mm scarfed.

IMPORTANT

We require a pattern 1:1 of thin plywood to produce the deck board.

We need a deck layout sketch to submit a detailed offer.
